*What's been happening with the website-*

The Events page is up to date with the latest information I have received for posting. The Resources page has been reworked slightly, but contains the same basic information as it had previously. Some Districts have submitted new meeting list information and those District NFA webpages have been updated. DRs and AISLs, please check your District's NFA webpage to see if the information is current. I try to make updates to the website at least once a week, but will gladly try to make same-day changes for any serious errors you find (like broken links).

When sending documents to be posted on the website, please send .doc (Word) or .pdf (Acrobat) files whenever possible. One very important reminder- always be sure to check your document before sending it to me to be sure it does not contain any personal information that you do not wish to have blasted across cyberspace!

The anonymous email addresses for the Officers and Coordinators have been set up to forward email to the email address on the CMA provided by Lois. Instructions for accessing the NFA email accounts or for setting up Outlook or another email client to receive the NFA email is available for those who want it.

One last note- when sending email regarding anything to do with the website or other NFA AFG matters, please remember to include "NFA AFG" in the subject line. Email without this information will very likely not make it past my spam filters. I may like sausage, but I don't care for spam...
